

Eco Committee Newsletter

Welcome to our Eco Newsletter, find out here about the work Eco club have been doing. You can also look out for tips on how to be more Eco friendly at home.

Eco News

Year 3 have been busy tidying the wildlife garden and planting bee-friendly flower seeds. This will help to attract bees to our school grounds. Do you like honey? Without bees, we would have no honey!

Nursery children have been looking after caterpillars and watching them turn into beautiful butterflies. They have been released into our school grounds. We are working on biodiversity this half term and we hope the butterflies will like living in our wildlife area.

Eco Club did a litter pick around the school grounds and picked up a whole binbag full of litter! We are now spreading the word around school about eating healthy snacks at playtime and putting fruit waste in the compost bin.

Our tips on helping to keep the planet safe:

- Don't leave the lights on if it's sunny or if you're not in the room
 - Don't cut down trees – did you know that trees help us to breathe? They breath out oxygen
 - Use materials that are suitable for the environment
 - Turn the tap off when you are not using it
-
